

What we do.

We are a Perth based company who specialise in pre-programming, installation, and support for smart homes and surveillance systems.

What make us different?

- Affordable
- Off the shelf - easily add more yourself

We create a system that is not only affordable but easy to customise. Along with helping customise your smart home we will also support you to learn how to make your own changes to your smart home.

ndis and Home Care Packages

- **NDIS** registered
- Adaptive control
- Low cost AT

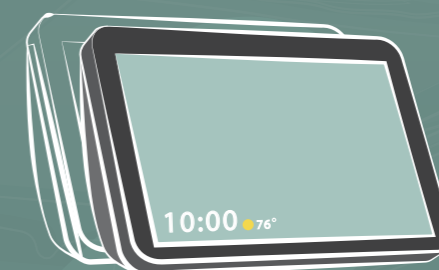

We are an NDIS registered provider. Most of our products are considered low cost, low risk assistive technology and therefore can be paid for out of the participants consumables budget.

Choose your Smart Home Hub -

A smart home hub is the heart of your smart home, it is a system that links every other part of your home to one spot. Allowing you to automate the functions of your home via a voice assistant.

Google Nest Hub

Amazon Echo Show

Apple HomePod

Pick a Smart Home Hub that suits you best!

Choose a smart home hub that suites the technology you currently use. Each hub has similar features, but we can guide you to pick a hub that integrates best with your current technology.
